

AI.MARKETING GUIDE

Discover the power of Artificial Intelligence.

Im going to presentate you my money making method that actually maded me some extra income.

I generate every month about 30% Passive income that i cashout or reinvest.

I recommend to reinvest in the beginning, so you can actualy make more after a few months.
Its 100% Your choice.

In this method, im going to tell you :

What is this platform?

How to use it?

Tips and tricks?

Proof?

1. Introducing the platform

2. Sign up on the platform

3. Explanations, tips and tricks

4. Disclaimer

Introducing platform.

I presentate you AI.marketing.

AI.marketing is a website that makes advertising for you 100% automatically.

To make it easy, ai.marketing is a website that makes advertising with your money, but pays you out with cashback + your own investment.

So actually you get your money back + profit, wich is around 30% per month.

AI.marketing works with an AI that makes the avertising for you.

What is AI?

This is AI (Artificial intelligence, which aims to do digital marketing in order to promote products and services for partner companies.

This is 100% legal, automatic and safe!

How does it work?

It's an AI in deep learning.

For those who don't know what it means, it means that AI learns on its own and is therefore more efficient in the long run. (More investment).

The goal is that from your advertising budget, AI will create ads based on trend, keywords whether via google ads, facebook and and etc.

You earn a commission for each of these sales.

To do this, it uses NLU technology, which, without going into detail, allows the AI to understand the meaning of words and texts and thus to create much more qualitative and targeted advertisements.

The monetization system for this AI is very simple.
it is based on the cashback principle.

As mentioned above, AI does marketing to generate sales for large companies.

Each sale made via your AI, the company pays you a cashback that varies between 2% and 35%.

AI is currently partnering with 50 companies for its development and aims to have 100 companies by 2021-2022.

AI.Marketing started in 2017.

Example:

So AI.Marketing uses your advertising budget to make advertising like we sayd before.

After costumers gets attracted (Automatic) by your advertising , the cashback operator (a company), gives you the advertising budget and a cashback.

First, the cashback is going to come in 'PENDING' bequase they need a X time to get you payed out.

This will be from 15 to 60 days.

So this is not an instant money making method, you need time to get payed by the aggregators.

So the first month, you are not going to make so much, bequase al the profit is going to be in 'PENDING', but after a month +/-, you are going to get payed out in CASHBACK.

CASHBACK is your budget that you actually can pay our or RE-invest.

you will see that you always wil get payed out from the previous month +/-.

After 2 months of usage, you will always get payed out (every day) bequase you are longer than 1 month active.

How to get started

first of all i want to tell you guys that you can get free 50\$ on you advertising balance.

You can register on this : <https://ai.marketing/es/campaign/j6kjmsj9tc>

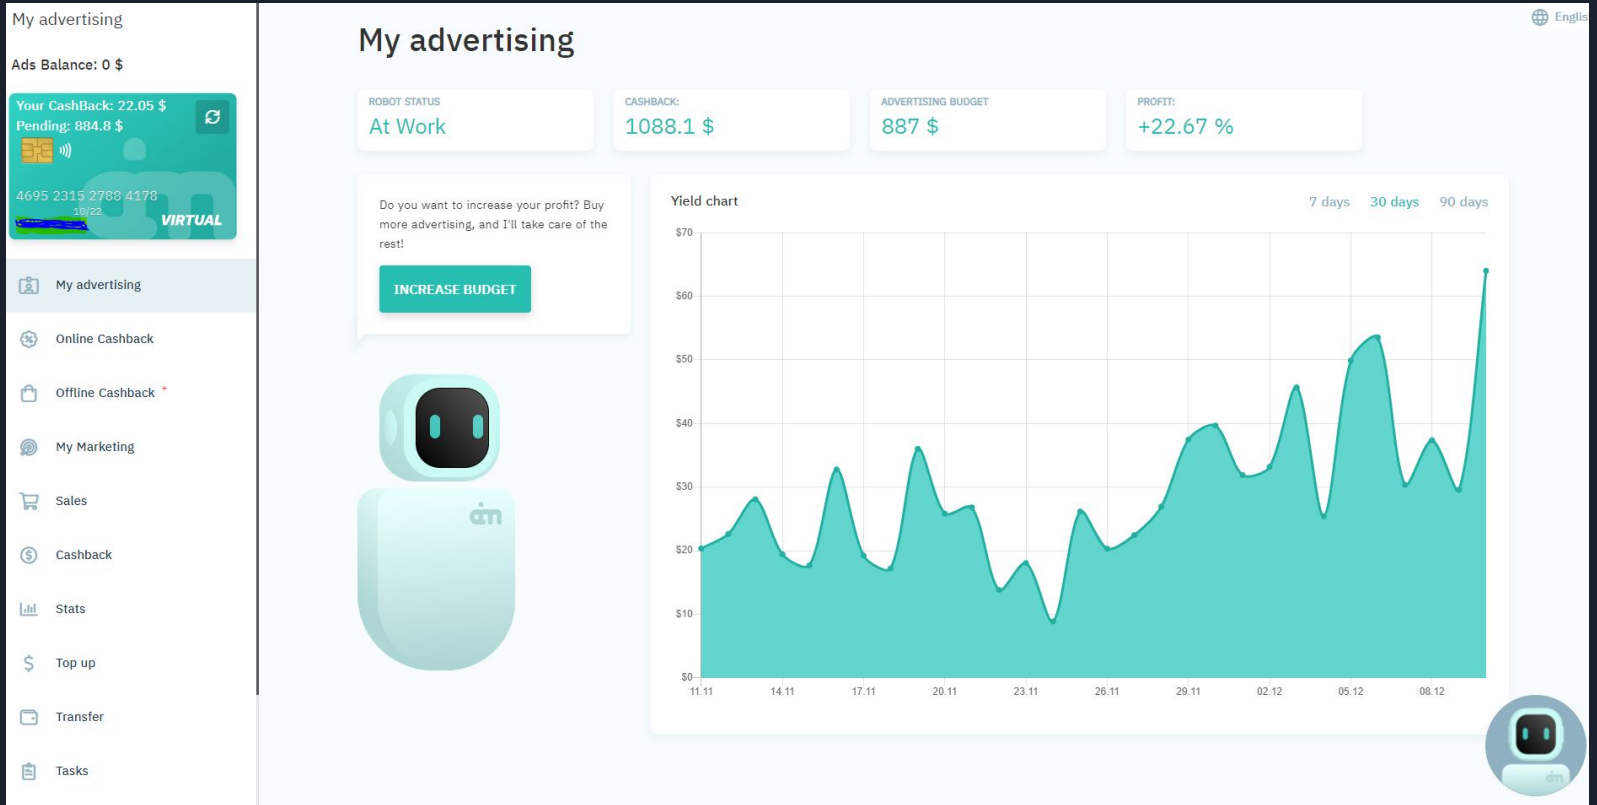

Make sure to confirm your account via the email that you received.

PS: you can change the languages of the website at the top right of the website.

The diagram illustrates the process of getting started on the ai.marketing website. It features a blue background with several key elements:

- Registration:** A white rounded rectangle on the left contains a blue icon of a person and the word "Registration".
- URL:** A white rounded rectangle on the right contains the URL <https://inb.network/#/?ref=68a9022>.
- Sign in:** A dark green rounded rectangle at the bottom left contains the text "Sign in" and four social media icons (Facebook, Twitter, YouTube, Instagram). The Twitter icon is highlighted with a red box. Below the icons, it says "Signing in you confirm that you have read and accepted the User Agreement and Privacy Policy".
- Sign in button:** A screenshot of the website's top navigation bar at the bottom right shows a "SIGN IN / SIGN UP" button highlighted with a red box.
- Arrows:** Hand-drawn blue arrows indicate the flow from the registration button to the URL, from the URL to the sign-in button, and from the sign-in button to the sign-in page.
- Money icon:** A hand-drawn blue icon of a money bag and stacks of coins is positioned in the center, representing the advertising balance mentioned in the text.

Once you registered, go to your AI panel.

My advertising

This is the tab where you see your daily income.
Your daily income is (your investment + profit).
Here you can see if your robot Status.
If he's working, its saying that your robot haves advertising budget.
If its not working, you need to invest to make the robot work.
You can also see here your advertising budget and your profit in %.
I dont like to see the profits on this tab, bequase its not 100% right.
After, i will tell how you can calculate your profits.

CASHBACK is the money that you received in total, but its not YOUR CASHBACK.

cashback = Your cashback + Pending
Your cashback is actually what you can cashout or reinvest.
Pending is what you are waiting for to get payed out.

YOUR ROBOT WILL STOP IF HE HAVES BELOW \$10.

Online Cashback

We are not going to use this tab, simple as that, not profitable.

Here you will be able to see concretely every sale that the robot has made thanks to the ads.

Date of sale	Aggregator	Sale amount	Cashback rate	Your Cashback	Deduction	Await	Status
12-12-2020 20:53	VICTORIAS SECRET	8.63 \$	8.00 %	0.38 \$	0.31 \$	=38 days	Pending

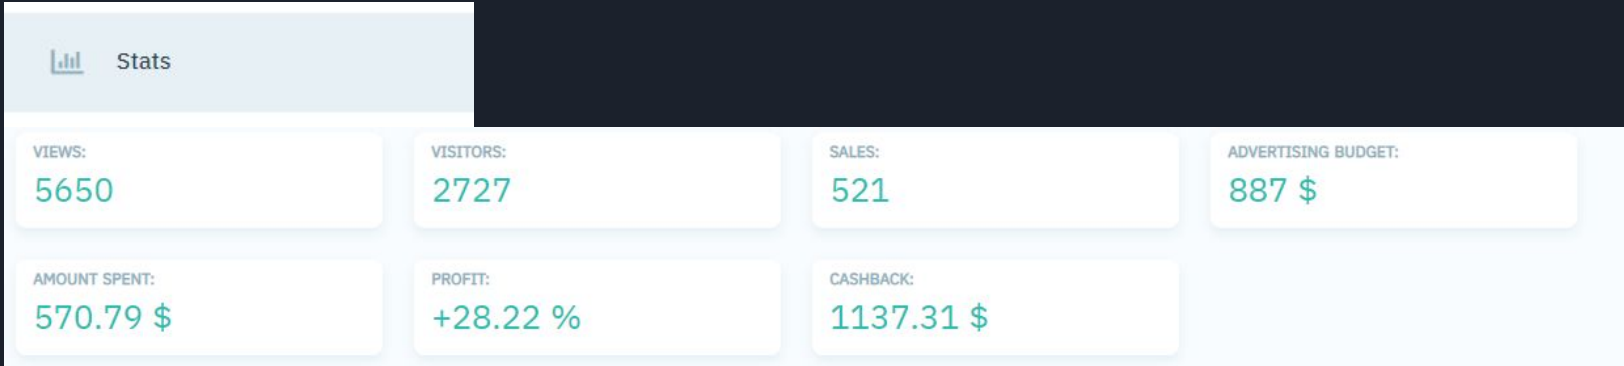

The picture is very clear and allows us to see that a sale of 8\$ at Victoria's secret with a rate of 8% will earn us about 0.38\$.

in this example the cashback will be validated within 38 days.

This varies on average between 19 and 30 days.

Dont forget that you make alot of sales a day, as you see, my yield is alot more per day.

viewpoints : Number of times someone saw the ad and took the time to read it at a minimum.

visitors : Number of times someone clicked on the ad and landed on the site.

Sales : Every time a customer passes command, it flows from source.

Amount spent : is the amount spend of your advertising budget.

Cashback: investment + profit.

Example: you see that my cashback is 1137, thats actually what im going to receive.

IF you do your cashback minus your amount spent, you have your net profit.

In this case, i have $1137,31 - 570,79 = \$566,21$ PROFIT

Transfer

Here you can cashout your profits.

Or if you want to quit, you can also cash your advertising budget in after usage.

VERY IMPORTANT: If you used the gift certificate, you are going to need to give the gift certificate back.

This is like a little loan, but its nice bequase your can make your first bucks with it.

After that, your first personal withdraw will need to be 100\$.

SO :

First withdraw is to give the \$50 back.

Second withdraw is going to be your, but needs to be minimum \$100.

I HIGHLY RECCOMEND to cashout in ETH or BTC.

You can easily make a coinbase account , it will make a wallet for you and you only need to give in the wallet adress when you are going to cashout.

\$ Top up

Here you can Top-up your balance in different methods.

If you didnt received the FREE \$50, you can add this one here.

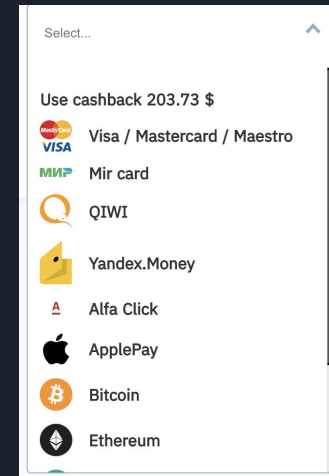

Click on the tab , and search for 'GIFT CERTIFICATE', here you can enter this code:

0HXZ-KZH7-8EVZ-G6R4

You can Re-invest your money here asswel.

IF you have 'YOUR CASHBACK' you can invest it back.

In the tab you will see ' USE CASHBACK' :

Tips & Tricks

When your account is credited, your money will stay for 48 hours in stand-by in your “balance of ads”.

Once your budget is allocated to your robot, the AI will start working on its own.

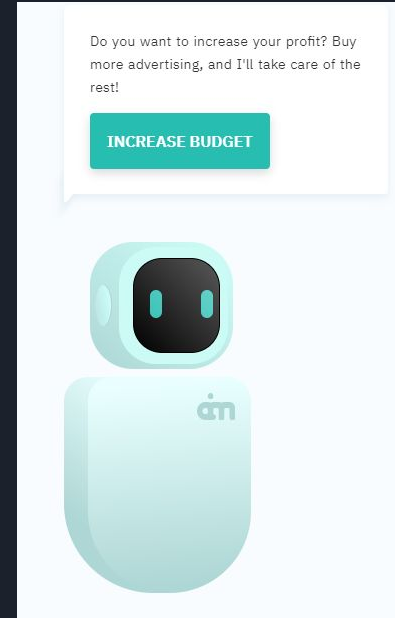

Your robot must always have the ‘at work’ status.

In order not to stop it, you must have a minimum requirement of 10\$ on your advertising balance.

So always plan to invest.

You should know that your AI scales according to your investment.

ROBOT STATUS At Work	CASHBACK: 1137.31 \$	ADVERTISING BUDGET 887 \$
-------------------------	-------------------------	------------------------------

Tips & Tricks

Invest and re-invest till you got a big advertising budget.
So after, you can cashout if you have a nide budget.
Always plan to reinvest.

Be patient and let the bot do the work, it will make profit 100% for sure.
I used this platform for months now and it worked perfect.

Example of a scenario depending on your investment.

50\$ offered - 50\$ investment :

That would give us a budget of 100\$ per month (its possible that ai will spend everything before the end of the month, but it'll be around 20-25 days).

Let's assume that you're going to have a average profit of 40% on what you invested or 140\$ for 100\$.

You will first have to pay back the 50\$ loaned by AI. so you'll have 90\$ left from now on with this very simple suite we get:

$N1\ 90 - n1 \times 1.40 - 11$ (september 2020 to 2021) = 3644 total cashback.

To find the profit, you just have to substract n11 to n10 - i.e. $3600 - 2600 =$ about 1000\$ per month having invested only 50\$ at the very beginning. and obviously, it will continue to sife if you let it last longer.

So you have to understand that it is a very profitable investment.

However, it will be on the very long term if you invest a little.

More investment = more profit.

DISCLAIMER

We can't repeat ourselves enough, but this revenue stream is just one of many.

The goal is not all-in because you never know what the future holds.

Invest only what you can at your own pace and make the choice whether or not to keep 100% of the turnover to yourself or reinvest 100% to earn more the following month all this up to you.

The 40% profit is still an average but you will always turn around 30 - 150% (except at your first few days).

Remember that the more you invest, the more likely you are to make sales through ads because there will be more of them.
