BUILD A WEBSITE!

step 1.) choose your web host for your website, I use [squarespace.com](https://www.squarespace.com) for hosting, they are safe and reliable, it is good to go with someone you trust and wont have network problems etc.

Tip: Don't buy a domain on squarespace (to expensive) use [namecheap.com](https://www.namecheap.com) and transfer to squarespace. To save \$\$\$

Step 2.) Now that you have finished step one, you will want to Monetize your website.

Ways to monetize:

- **Affiliate marketing** – they pay you to run ads on your website
- **Paid membership** – in the example website I charge 9.99 a month to access beats
- **Sell digital product-** you can sell digital product like music or E-books

Affiliate marketing is an advertising model that pays third-party publishers to generate traffic or leads to the company's products and services. The third-party publishers are affiliates, and the commission fee incentivizes them to find ways to promote the company.
